지우개해석법 특강

14:00

16:30

지우개 해석법이란?

번역은 그만, 불필요한 부분은 지우고 의미파악에 집중하는 해석법

▶ 시간은 단축하면서도 보다 정확한 해석이 가능하게 만들어주는 정지안T 시그니처 해석법

어떻게 해야하나요?

[1] 문장의 핵심 읽기

주어 + 서술어 + 목적어 + 보어

[명사 + 동사 + 명사 + 명사/형용사]

[2] 수식 덩어리 구분하기

전치사구 덩어리

관계사절 덩어리

동격/삽입 덩어리

부사절/분사구문 덩어리

예시 덩어리

[3]지우기

not A but B

A rather than B

비교급 구문

정도 of N

although, though, despite, in spite of

tend to, manage to, be likely to, be supposed to, come to

열거, 나열

[4]단순화

시제와 태

수량형용사

조동사의 관용표현

spend / waste

결과와 원인

- 
1. Considering products with material properties, such as clothing or carpeting, consumers like goods they can touch in stores more than products they only see and read about online or in catalogs.
 2. New ideas, such as those inspired by scientific developments, are often aired and critiqued in our popular culture as part of a healthy process of public debate, and scientists sometimes deserve the criticism they get.
 3. Of particular importance in considering emotional changes in old age is the presence of a positivity bias: that is, a tendency to notice, attend to, and remember more positive compared to negative information.
 4. The really interesting and important aspects of science were increasingly those invisible to the naked eye, and the classification of things collected no longer promised to produce cutting-edge knowledge.
 5. Having the ability to take care of oneself without depending on others was considered a requirement for everyone.
- 

- 
6. It is only when a political issue affects the welfare of those in a particular group that identity assumes importance.

 7. So essential are social connections for our survival and well-being that we not only cooperate with others to build relationships, we also compete with others for friends.

 8. While most managers can only dream of having customers that are as passionate about their products as sport fans, the emotion triggered by sport can also have a negative impact.

 9. Much of what we do each day is automatic and guided by habit, requiring little conscious awareness, and that's not a bad thing.

 10. So I would say that the simple reason why the majority of scientists are not creative is not because they don't know how to think, but because they don't know how to stop thinking!

- 
11. Consider, for instance, a teenager whose parents are suspicious and distrustful when she goes out at night; even if she has been forthright about her plans and is not breaking any agreed-upon rules, her identity as a respectable moral subject is undermined by a pervasive parental attitude that expects deceit and betrayal.
 12. Since robots are particularly good at highly repetitive simple motions, the replaced human workers should be moved to positions where judgment and decisions beyond the abilities of robots are required.
 13. One of the most common mistakes made by organizations when they first consider experimenting with social media is that they focus too much on social media tools and platforms and not enough on their business objectives
 14. The creator of humour is putting ideas into people's heads for the pleasure those ideas will bring, not to provide accurate information.
 15. Because of the inner qualities with which the individual is endowed through heritage and environment, the mind functions as a filter; every outside impression that passes through it is filtered and interpreted
 16. The time doctors use to keep records is time they could have spent seeing patients.

Mending and restoring objects often require even more creativity than original production. The preindustrial blacksmith made things to order for people in his immediate community; customizing the product, modifying or transforming it according to the user, was routine. Customers would bring things back if something went wrong; repair was thus an extension of fabrication. With industrialization and eventually with mass production, making things became the province of machine tenders with limited knowledge. But repair continued to require a larger grasp of design and materials, an understanding of the whole and a comprehension of the designer's intentions. "Manufacturers all work by machinery or by vast subdivision of labour and not, so to speak, by hand," an 1896 Manual of Mending and Repairing explained. "But all repairing must be done by hand. We can make every detail of a watch or of a gun by machinery, but the machine cannot mend it when broken, much less a clock or a pistol!"

- ① Still Left to the Modern Blacksmith: The Art of Repair
- ② A Historical Survey of How Repairing Skills Evolved
- ③ How to Be a Creative Repairperson: Tips and Ideas
- ④ A Process of Repair: Create, Modify, Transform!
- ⑤ Can Industrialization Mend Our Broken Past

It has been suggested that "organic" methods, defined as those in which only natural products can be used as inputs, would be less damaging to the biosphere. Large-scale adoption of "organic" farming methods, however, would ①reduce yields and increase production costs for many major crops. Inorganic nitrogen supplies are ②essential for maintaining moderate to high levels of productivity for many of the non-leguminous crop species, because organic supplies of nitrogenous materials often are either limited or more expensive than inorganic nitrogen fertilizers. In addition, there are ③benefits to the extensive use of either manure or legumes as "green manure" crops. In many cases, weed control can be very difficult or require much hand labor if chemicals cannot be used, and ④fewer people are willing to do this work as societies become wealthier. Some methods used in "organic" farming, however, such as the sensible use of crop rotations and specific combinations of cropping and livestock enterprises, can make important ⑤ contributions to the sustainability of rural ecosystems.

News, especially in its televised form, is constituted not only by its choice of topics and stories but by its _____. Presentational styles have been subject to a tension between an informational-educational purpose and the need to engage us entertainingly. While current affairs programmes are often 'serious' in tone sticking to the 'rules' of balance, more popular programmes adopt a friendly, lighter, idiom in which we are invited to consider the impact of particular news items from the perspective of the 'average person in the street'. Indeed, contemporary news construction has come to rely on an increased use of faster editing tempos and 'flashier' presentational styles including the use of logos, sound-bites, rapid visual cuts and the 'star quality' of news readers. Popular formats can be said to enhance understanding by engaging an audience unwilling to endure the longer verbal orientation of older news formats. However, they arguably work to reduce understanding by failing to provide the structural contexts for news events.

- ① coordination with traditional display techniques
- ② prompt and full coverage of the latest issues
- ③ educational media contents favoured by producers
- ④ commitment to long-lasting news standards
- ⑤ verbal and visual idioms or modes of address

Retraining current employees for new positions within the company will also greatly reduce their fear of being laid off.

Introduction of robots into factories, while employment of human workers is being reduced, creates worry and fear. (①) It is the responsibility of management to prevent or, at least, to ease these fears. (②) For example, robots could be introduced only in new plants rather than replacing humans in existing assembly lines. (③) Workers should be included in the planning for new factories or the introduction of robots into existing plants, so they can participate in the process. (④) It may be that robots are needed to reduce manufacturing costs so that the company remains competitive, but planning for such cost reductions should be done jointly by labor and management. (⑤) Since robots are particularly good at highly repetitive simple motions, the replaced human workers should be moved to positions where judgment and decisions beyond the abilities of robots are required.
